Hillsboro, Oregon, June 23, 2009 – CoorsTek, Inc., a large technical ceramics supplier and manufacturer of critical components for the pulp and paper industry and other high-technology markets, today officially announced the signing of an agreement with GL&V to sell and service CoorsTek ceramic components for the global pulp and paper industry. Paper mills presently using CoorsTek ceramics may now contact GL&V directly for replacement components, repair, and regrind services.

GL&V's Paper Machine Dewatering Technologies Group serves the global pulp & paper industry and specializes in providing wet-end technical solutions and optimization for our customers. The agreement includes paper machine wet-end and press section ceramic elements, and ceramic cleaner cones for stock preparation.

“Formalizing our relationship with CoorsTek completes our product offering – if it is on a paper machine and made with ceramic, we can supply it and we can service it. Our customers will certainly benefit by combining GL&V's second to none technical and applications knowledge with CoorsTek premium high-technology ceramic components.” said Paul Henzell, Global Business Manager for GL&V's Dewatering Technologies Group.

Paper mills presently using CoorsTek ceramics may now contact GL&V directly for element replacement, repair, and regrind services.

**More about GL&V Pulp & Paper:**

GL&V Pulp and Paper, a division of the Canadian-based company GLV Inc., is a global enterprise in technology and processes for manufacturing of pulp and paper as well as in production and treatment of fresh, process and waste waters.

GL&V Pulp and Paper group provides complete solutions for production of pulp and manufacturing of paper. The GL&V Pulp and Paper group is one of the largest suppliers of pulp and paper production equipment and a world leader in equipment rebuilds, upgrades and optimization.
