Facility serves as a leading provider of ceramic components in the region.

Golden, Colorado, July 1, 2003 – CoorsTek COO Derek Johnson today officially announced the opening of a recently completed 8,900 square foot building addition to its Gumi City, Korea facility. With this addition, CoorsTek Korea now has over 20,000 square feet (1858 square meters) of manufacturing space available in Korea.

The CoorsTek Korea building expansion is intended to provide additional ceramic machining services to support the company's growing customer base in Asia. CoorsTek also intends to install new manufacturing capabilities to enhance participation in new business segments for CoorsTek Korea.

The Korean facilities continue to play an integral role in supporting the company's growing presence in Asia. CoorsTek Korea is a leading supplier of ceramic components to the semiconductor, telecommunications, medical, and other industrial markets in Korea. The Korean facilities also support the CoorsTek worldwide customer base by offering regional sourcing opportunities for U.S. customers with operations in Asia.

CoorsTek Korea was founded on December 17, 1999 and currently has 55 employees. The company has increased its revenues by 300% over

the past 3 years. CoorsTek Korea is an ISO 9001 certified facility with Class 100 cleanroom capabilities.

CoorsTek designs and manufactures components, integrated assemblies and automated systems for high technology applications. Using technical ceramics, precision-machined metals, high-performance plastics, and ultra-pure fused quartz, CoorsTek engineered solutions enable its customers' products to overcome technological barriers and improve performance.
